

To The FCC Director.

Dear Sir, I am contacting you to register my opinion as relates to the XM Satellite Radio service that I subscribe to. As a "Paid Subscriber", and listener, I am using this service to gather important traffic and weather information, as well as entertainment, and find that it is a very good service and not easily equalled by regular radio and television service, especially where I live. I am a traveling salesman and I also live in a remote area of the Upstate of South Carolina, and local radio service is very limited, so that is why I purchased my radio system, and pay a monthly subscriber fee to insure that I can receive the latest and most accurate information available, without commercial interruption that pervades the airways these days.

This is a very important service to me, and it should not be up to the National Association of Broadcasters to decide what programming that I am permitted to hear. I would respectfully urge the FCC to reject in its entirety, the NAB's Petition #04-160 to limit what service I can receive from my "Paid" subscription to XM Satellite Radio Service. I am extremely pleased with the service's that I receive from XM Satellite Radio, and would not like to see the NAB or any other group try to dictate what service I can subscribe to now or in the future.

Sincerely,

Charles Crosby
